(54) Title: LAMINATED GLASS

(57) Abstract: To achieve an excellent solar radiation shielding properties and a visible light reflectance of at least 70%, the interlayer portion of the laminated glass of the present invention includes a heat reflecting film and a film having a heat shielding function that is provided between the heat reflecting film and the second glass sheet. The heat reflecting film may be an optical interference multilayer film obtained by laminating layers of two types of polymer thin films having different refractive indices. The film having the heat shielding function can contain fine particles of at least one selected from hexaboride and ITO. The laminated glass can be bent to have a convex surface and a concave surface. In this laminated glass, the convex surface is formed by the first glass sheet and the concave surface is formed by the second glass sheet.

Eurasian patent (AM, AZ, BY, KG, KZ, MD, RU, TJ, TM),
European patent (AT, BE, BG, CH, CY, CZ, DE, DK, EE,
 ES, FI, FR, GB, GR, HU, IE, IT, LU, MC, NL, PT, RO,
 SE, SI, SK, TR), OAPI patent (BF, BJ, CF, CG, CI, CM,
 GA, GN, GQ, GW, ML, MR, NE, SN, TD, TG).
